1. Sequence 314, Application US/09205658

1. Patent No. US20010029617A1

1. GENERAL INFORMATION:

1. APPLICANT: NUVENN. GAY

2. APPLICANT: OGY. SCOCT

2. TITLE OF INVENTION: THERAPEUTIC AND DIAGNOSTIC TOOLS FOR

3. TITLE OF INVENTION: IMPAIRED GLUCOSE TOLERANCE CONDITIONS

3. TITLE OF INVENTION: UMPAIRED GLUCOSE TOLERANCE CONDITIONS

5. TILLE REFERENCE: 00786/331004

5. CURRENT APPLICATION NUMBER: US/09/205,658

5. CURRENT FILING DATE: 1998-12-03
                                                                                                                                                 933 ATATCTT 927

Sequence 1600, Application US/09764864

Patent No. US20020132733A1

GENERAL INFORMATION:

APPLICANT: RESERVE et al.

TITLE OF INVENTION: Nucleic Acids, Proteins, and Antibodies

FILE REFERENCE: PTZ23

CURRENT FILING NUMBER: US/09/764,864

CURRENT FILING DATE: 2001-01-17

Determination of this BAC-end sequence was carried out as part of a collaboration with the European Drosophila Genome Project (EDGP) - http://www.edgp.ebi.ac.uk - This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton and Geneyleve Payan. It has been constructed in the vector
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        GSS 26-JUL-1999

The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Oscegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Generics at the Roswell Park Cancer Institute in Buffalo, . NY. The library is named RPCI-98 and was constructed by partial Ecost dispession of Drosophila DNA provided by the BDGP from the BDGP's pland EST libraries. A more detailed description of the library and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://bacpac.med.buffalo.edu/drosophila_bac.htm.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Drosophila melanogaster genome survey sequence TET3 end of BAC # #ASCR12K22 of RPCI-98 library from Drosophila melanogaster (fruit AL060767
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps
